Media Coverage

A MODERN SOLUTION FOR A MODERN WORLD

A luxury alternative to old-fashioned flatware, Curvware represents a lifestyle change. They are a milestone in the development of eating utensils. Unlike conventional flatware, each piece is individually hand-crafted by Italian artisans of the highest grade stainless steel (18/10) and silver-plate. Curvware's superior patented design sets a **New Standard in luxury**, comfort and practicality in the dining experience.

Whether it is the fashion industry, driven by innovation, or a bride seeking the latest trends ... Curvware 'fits'.

***Put them on the tables and
watch what happens!***

i

IT'S ALL ABOUT THE *PRESENTATION*

Curvware, Inc. recognizes that for **Luxury, Trendsetting Caterers**, it is all about **presentation**. Whether it is the wedding reception of a fashion conscious bride or a catered Fashion Show, few things will contribute more to creating a lasting impression than Curvware.

SURPRISE!

There is no explaining it. One has to experience the '*incomparable feel*' of Curvware to believe it. Discovering the comfort is half the fun!

[BACK](#)[NEXT](#)

One of many ways to set a 'trendy table'

For an experience your 'trendsetting clients' will never forget!

FRONT OF THE HOUSE

Setting the tables: Curvware allows event designers and caterers many different ways to set the tables..

It won't be the focus of the Event, but it will make it memorable: After experiencing Curvware, guests will be talking about the event for days.

BACK OF THE HOUSE

Reduced Labor: Our [proprietary rack](#) makes it simple to collect, sort and wash the Curvware utensils. No pre-soaking or sorting. A many stage operation is reduced to one! It won't be the reason you put Curvware on the tables, but the staff will love them!

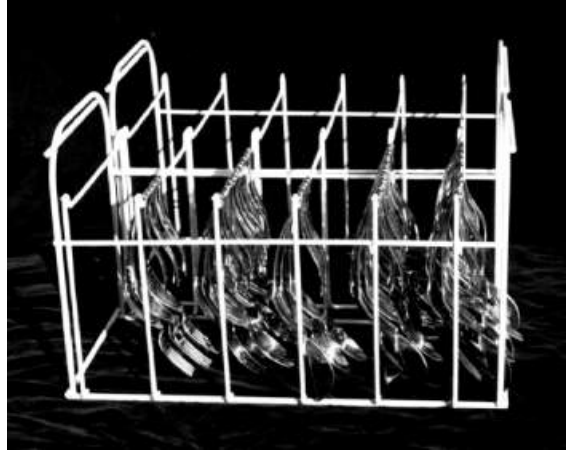

Improved Hygiene: With a single pass through the dish washer, Curvware will come out perfectly sterile. See the racks here ([washing system](#)).

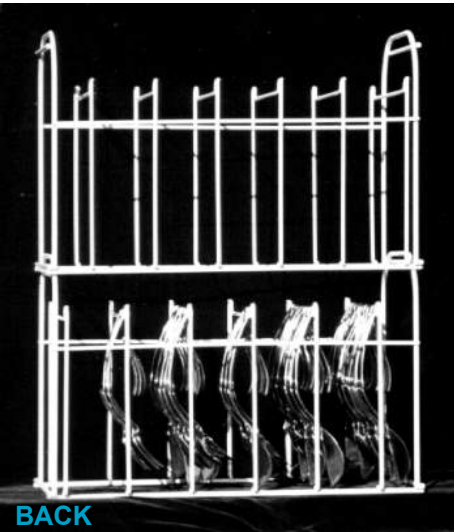

SETTING UP - GATHERING - WASHING - STORING ... has never been easier.

Curvware™ doesn't 'nest'. Hanging vertically, Curvware takes advantage of the vertical spray which cleans them in one pass compared to numerous passes to clean flatware. The racks eliminate the need for bins and storage trays.

***Wash 360 pieces
in a single pass!***

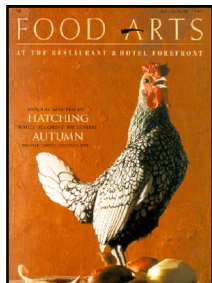

Fast Collection Fast Washing Fast Storage

Two of the epoxy coated racks fit side by side in the standard dishwasher tray. Each rack holds 30 sets of Curvware. In the configuration to the left and above the racks are loaded by bussers and washed without ever being touched by kitchen staff. After drying they can be taken directly to a wait station.
